ALPINESTONE

architectural stone overlay.

Diagram 1: Stone Fixture Details.

Fibre Cement Board/ 9mm Eterpan
(To be applied strictly in accordance
with manufacturer's instructions.)
Usually fixed to the wall/feature.

Adhesive Mortar

Adhesive mortar is applied to the back surface of Alpine Stone modules and then fixed to the surface/fibre cement board.

Alpine Stone Product
Fixed directly to Cement
Board using Adhesive mortar

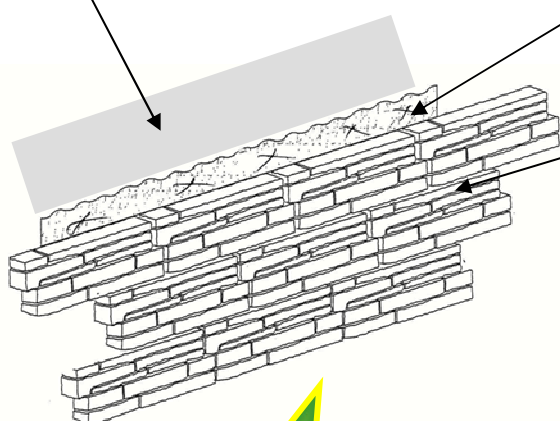

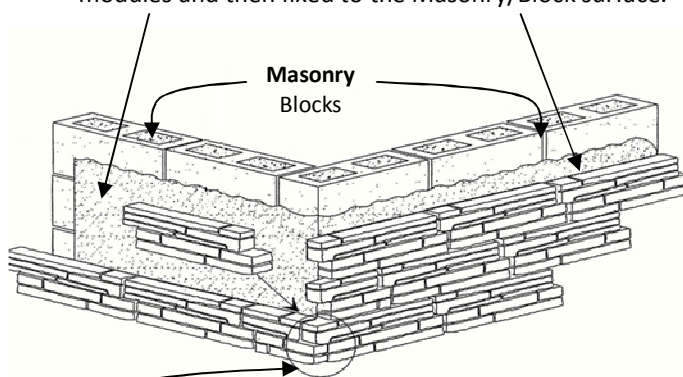

Diagram 2: Stone Corner Details

Adhesive Mortar

Adhesive mortar is applied to the back surface of the Alpine Stone modules and then fixed to the Masonry/Block surface.

Masonry
Blocks

Corner Details

Each module interlocks, preventing
the need of corner stone's completely.

Adhesive Mortar
Between Joints

Visit our website
to see the full range of stone:
www.alpinstone.co.nz

Alpine Stone Overlay available:

Ledgestone*
River Stone

Schist 90*
Wanaka Schist

Schist 150*
Otago Schist

Blue stone
Taupo Stone

*These stone modules are 'z' shaped, therefore eliminate the need for corner stones. (Very easy for installation!)
Thickness of stone modules approx 40-70mm.
